D20 INVOICE AI

Cookie Policy

Last updated 11 June 2026 · The small number of cookies and local-storage keys D20 sets, what each one does and how to control them.

1. Our approach

D20 uses only cookies and browser storage that are strictly necessary to sign you in, keep you signed in securely and remember your preferences. We do not use advertising cookies and we do not load third-party trackers on the app.

2. Cookies we set

Name	Purpose	Type	Lifetime
access_token	Signs each request to the D20 API once you log in	Strictly necessary · HttpOnly, Secure	15 minutes (refreshed automatically)
refresh_token	Lets D20 issue a new access token so you stay signed in	Strictly necessary · HttpOnly, Secure	7 days
d20_device	Recognises this browser so we only email you about sign-ins from new devices	Security · HttpOnly, Secure	12 months
Stripe (__stripe_mid, __stripe_sid)	Set by Stripe on the Checkout and Billing portal pages for fraud prevention	Strictly necessary · third party	1 year / 30 minutes

3. Local storage (not cookies)

Key	Purpose
d20-theme-v2	Remembers light or dark mode
d20-base-currency	Remembers the display currency for amounts
d20-install-dismissed	Remembers that you dismissed the 'Add to Home Screen' prompt

4. Marketing pages

Our public pages (home, pricing, legal) set no cookies at all unless you sign in.

5. Managing cookies

Because every cookie we set is required for the Service to work, there is no cookie banner to accept or reject. You can delete cookies through your browser settings; doing so will sign you out. Blocking cookies entirely will prevent you from signing in.
